#### SECTION I

#### INTRODUCTION

An actuarial valuation of the Teachers' Retirement System of the State of Montana has been completed as of July 1, 1981. This valuation was authorized by the Teachers' Retirement Board under Section 19-4-201, M.R.C. The purpose of the valuation was to determine the financial position of the fund, the normal cost, and the unfunded accrued liability based upon present and prospective assets and liabilities of the system as of July 1, 1981.

Section II presents an analysis of the results of the actuarial valuation. The numerical findings supporting this analysis are shown in Section III.

In conducting the actuarial valuation, certain assumptions were made as to the future experience of the system. A summary and discussion of each of the assumptions is contained in Section IV.

The valuation is based upon the Teachers' Retirement Act and incorporates all amendments as of July 1, 1981. Employee data and other records supplied by the system are summarized by classification in Section V and VI. A summary of the major provisions of the Act is contained in Section VII.

# ACTUARIAL CERTIFICATION

Based upon the assumptions stated in this report and the employee data and other records provided by the Teachers' Retirement System, the actuarial valuation contained in this report has been performed in accordance with generally accepted actuarial principles and techniques.

Alton P. Hendrickson Member, American Academy of Actuaries

#### SECTION II

#### ANALYSIS OF VALUATION OF TEACHERS' RETIREMENT SYSTEM

#### Summary of Findings

Based on the valuation which was conducted as of July 1, 1981, we have concluded that the Montana Teachers' Retirement System is funded on an actuarially sound basis. The present contribution rate of 12.619% of salaries is sufficient to finance the cost of benefits as they accrue in the future as well as to amortize the current unfunded liability over a period of 48.50 years. If the unfunded liability is to be funded over a recommended period of 40 years, the required contribution rate would be 13.339% of salaries.

The previous valuation as of July 1, 1979 was based on a contribution rate of 12.499% of salaries. This rate was increased to 12.619% by the 1981 Legislature to fund supplemental benefits to retirees. The 1979 valuation determined that a rate of 13.089% would be required to fund the unfunded liability over a recommended period of 40 years. The increased rate of 13.339% of salaries recommended by the 1981 valuation is partially attributable to the supplemental benefits to retirees.

The current amortization period of the unfunded liability based on the statutory contribution rates has increased from 48.15 years in 1979 to 48.50 years in 1981. There were many offsetting factors which resulted in this slight increase, as discussed below.

# Active Members

There were three factors pertaining to active mebers which substantially affected the results of this valuation:

1. In reviewing the data which had been prepared for the July 1, 1981 actuarial valuation, the Teachers' Retirement System determined that a majority of the salaries had been miscalculated. This miscalculation was found to have occurred in a computer program which had been prepared in 1975 by the State's data processing division for the sole purpose of extracting data for the actuarial valuation. The program inappropriately annualized all salaries, which resulted in salaries paid under a ten month contract being overstated by 20%.

|  | • |  |
|--|---|--|
|  |   |  |
|  |   |  |
|  |   |  |
|  |   |  |
|  |   |  |
|  |   |  |
|  |   |  |
|  |   |  |
|  |   |  |

The computer program was corrected and the salaries recalculated. From the revised figures, it was determined that the previous salaries had been overstated, in aggregate, by 18.6%. It was further determined that the salaries had been overstated in the previous three actuarial valuations.

A valuation was performed to determine the magnitude of the error generated by the inaccurate data. This valuation determined that the amortization period had been understated by 3.03 years and that the 40 year funding rate had been understated by .266%.

2. A major reduction in the funding requirements resulted from legislation pertaining to the handling of termination pay. A member may now (1) use the full amount in the calculation of the average final compensation by adequately compensating the System for the additional benefits, (2) pay the regular contribution on the termination pay and average such pay over all years of creditable service, or (3) exclude the pay from the average final compensation and make no additional contributions. Previously, termination pay was used to determine the final average compensation, with only regular contributions required.

This legislative change resulted in a reduction of .474% in the rate of salaries required to fund the benefits. This amount was sufficient to reduce the period of amortization of the unfunded liability by 6.39 years.

3. As a customary part of the valuation, we conducted a study to compare the actuarial assumptions against the actual experience of the System. The study revealed that the number of members receiving disability benefits is higher than had been projected by the actuarial assumptions. The study was based upon disabilities in the last eight years and determined that an increase in the disability rate assumptions was warranted.

A similar study of the withdrawal rates concluded that the number of actual terminations was less than had been projected. In setting new long-term withdrawal rate assumptions, consideration was given to the current state of the economy which would tend to discourage terminations. It was also recognized that some school districts have had a reduction in personnel due to reduced enrollment.

The net result of the change in the disability and withdrawal assumptions was an increase in the funding rate of .201%. This resulted in an increase in the amortization period of 2.70 years.

The net effect of the disability rate changes was minor because the increased liability for disability tended to offset the liability for retirements. The majority of the funding rate increase was attributable to the change in the withdrawal assumptions. A summary of the new actuarial assumptions is shown in Section IV.

#### Inactive Members

The liability for inactive lives increased substantially from the previous valuation. This increase was mainly attributable to the increase in average monthly benefits. The average monthly benefits for the retirees, disableds and survivors increased from \$337 to \$417. The increase in average benefits resulted from new retirees as well as supplemental benefits granted by the 1981 Legislature. The \$300 minimum benefit had the largest impact upon the average benefits.

An additional funding rate of .12% of salaries was approved by the Legislature to finance the cost of supplemental benefits to retirees.

The liability for disability benefits increased disproportionately because of a reclassification of disabilities in this valuation. Some disableds had previously been included under the category of retirement rather than disablity.

# General

The Teachers' Retirement System has made a concerted effort during the last two years to improve the quality of the data provided for the actuarial valuation. As a result, the data is more complete; in fact, no pertinent information was missing for inactive members. A sampling of the data has also shown the information to be quite accurate.

Our examination of the data leaves us no reason to believe that any major errors exist in the information used in this valuation. The computer calculations used to extract salary data for previous valuations were unfortunately in error, as discussed above. It is important that this dicrepancy be considered when comparing the results of this valuation with previous valuations.

A detailed summary of the members, salaries, and benefits is illustrated in Section VI of this report. The active members have been categorized into full-time and part-time members in order to prevent any distortion of the average salaries.

#### SECTION IV

#### ACTUARIAL FUNDING METHOD AND ASSUMPTIONS

The true cost of the Teachers' Retirement System will be determined by its own future experience. In determining the financial requirement of a system, certain assumptions must be made as to the expected future experience. This section summarizes the funding method applied as well as the basic assumptions used.

Any variations in the actual experience of the system from those assumed in this valuation may cause changes in the projected future costs of the system. It is therefore necessary that the actuarial assumptions be reviewed from time to time with adjustments as experience warrants. It is also important that regular valuations be performed to determine the financial effect of variations between the actual and assumed experience.

The assumptions shown below were based upon the actual past experience of the system together with our projections as to future experience.

# FUNDING METHOD

The method of funding employed is commonly referred to as the entry age normal cost method. This method establishes a normal cost of the system as well as an unfunded accrued liability. The normal cost is the level percentage of total salaries required to fund the benefits, assuming this percentage had been contributed since each member's entry into the system.

The unfunded accrued liability represents the excess of the present value of total liabilities over the present assets of the system and the present value of expected future contributions for normal costs.

In order to maintain the system on an actuarially sound basis, the total rate of contribution should be such as to meet the normal cost in addition to making progress towards the amortization of the unfunded accrued liability.

#### MORTALITY RATES

The mortality rates for males and females are based upon a published table referred to as the 1971 Group Annuity Mortality Table. The expected annual rates of mortality for selected ages are shown below:

| Age  | <u>Female</u>  | Male   |
|--|--|--|
| 25<br>30<br>35<br>40<br>45<br>50<br>55<br>60<br>65<br>70<br>75<br>80 | .035%<br>.047<br>.065<br>.094<br>.140<br>.215<br>.326<br>.549<br>.956<br>1.648<br>3.239<br>5.609 | .062%<br>.081<br>.112<br>.163<br>.292<br>.529<br>.852<br>1.312<br>2.126<br>3.611<br>5.529<br>8.743 |
| 85   | 8.918  | 13.010   |
| 90   | 13.858   | 17.945   |

### DISABILITY RATES

The disability rates are based upon the ordinary disability rates published by the Railroad Retirement Board in its eighth valuation, with modifications to reflect the Teachers' Retirement System's experience. The expected annual rates of disability for selected ages are shown below:

| Age | Annual<br>Rate of Disability |
|-----|------------------------------|
| 25  | .024%                        |
| 30  | .024                         |
| 35  | .032                         |
| 40  | .072                         |
| 45  | .152                         |
| 50  | .272                         |
| 55  | .496                         |
| 60  | 1.586                        |
|     |                              |

#### WITHDRAWAL RATES

The withdrawal rates are based upon a recent study of the experience of the Teachers' Retirement System. Sample rates are shown below:

| Age                                    | Annual<br>Rate of Withdrawal                                    |
|--|---|
| 25<br>30<br>35<br>40<br>45<br>50<br>55 | 14.50%<br>12.05<br>9.93<br>7.95<br>5.60<br>3.10<br>1.90<br>1.40 |

#### FUTURE SALARIES

The rates of future salary increases are based upon a recent study of longevity and meritorious increases by age. In addition to the base increases, an inflationary increase of  $5\frac{1}{2}\%$  per year is assumed. Sample rates are shown below for longevity and meritorious increases as well as total annual increases:

| Age | Longevity and<br>Meritorious | Total |
|-----|------------------------------|-------|
| 20  | 3.90%                        | 9.61% |
| 25  | 3.40                         | 9.09  |
| 30  | 3.00                         | 8.67  |
| 35  | 2.10                         | 7.72  |
| 40  | 1.10                         | 6.66  |
| 45  | .60                          | 6.13  |
| 50  | .50                          | 6.03  |
| 55  | .50                          | 6.03  |
| 60  | .50                          | 6.03  |

# RETIREMENT RATES

Based upon a recent study of the experience of the Teachers' Retirement System, retirements were assumed to occur at an average age of 62. The retirement age was appropriately adjusted for those members who had less than five years of service and for those who had already attained the average retirement age.

#### INVESTMENT EARNINGS

The annual rate of net return was assumed to be 7% for future investment earnings.

# EXPENSES

The administrative expenses are assumed to be paid from investment income in excess of the assumed rate of 7%.

#### ASSETS

The security investments are valued at amortized book value. The real estate mortgages are valued at full principle value.

#### SECTION VII

#### SUMMARY OF BENEFIT PROVISIONS

Vesting Period 5 years. No benefits are payable unless the member has a vested right.

Final Average Salary Average of highest 3 consecutive years

of earnings.

member receive less than the amount of his personal contributions with interest.

Normal Retirement Benefits Minimum of 30 years service or age 60;

maximum of age 70. The retirement benefit is equal to one-sixtieth (1/60) of final average salary for each year of service. The minimum benefit is equal to one-sixtieth (1/60) of \$7.200 for each year of

sixtieth (1/60) of \$7,200 for each year of service, for members retired prior to July

1, 1981.

Early Retirement Benefits Minimum age 55; the retirement benefit is calculated in the same manner as described

for normal retirement, but the monthly benefit is reduced ½ of 1% for each month

early retirement precedes age 60.

Death Benefits The death benefit is equal to one-sixtieth

(1/60) of final average salary for each year of service accrued at date of death with an actuarial adjustment based on the relation of the member's age at death to his beneficiary's age. In addition, a child's benefit of \$100/month is paid to

each child under the age 18 until age 18.

Disability Benefits

The disability benefit is equal to one-sixtieth (1/60) of final average salary

for each year of service accrued at date of disability. The minimum disability benefit is equal to one-quarter (%) of the

final average salary.

Withdrawal Benefits

With less than 5 years of service, the accumulated employee contributions with interest are returned. With more than 5 years, the member may elect a refund of contributions with interest, or may leave his contributions and retain a vested right to death and retirement benefits.

Tax Sheltered Annuity

The Teachers' Retirement System sponsors a tax-deferred annuity program for the benefit of its members. The policies of this program have been established in accordance with the guidelines set by the Internal Revenue Service. The benefits provided by this program are determined solely by the value of the member's account (voluntary contributions plus interest) using actuarial tables provided by the Retirement Board.

Contributions

Employee: 6.187% of compensation

\*Employer: 6.432% of compensation

\*This percentage will be increased to 6.463% on October 1, 1981 to provide funding for the purchase of creditable military service during the Vietnam conflict.
